

SkySims

Realistic Physics Integration
Beginner Training • License Exam Simulation
The Ultimate Training Tool

Drone Simulator

Real flight control system with authentic physical response

Professional Licensing Rules Quantified Training and Scoring System

Supports real drone controllers and VR headsets

Adjustable environments and multiple training scenarios

Customizable drones with parameter tuning

AI flight control algorithms validated in simulation and deployed to real drones

Multiple drone models and flexible environment settings

Custom UAV Integration Import Professional 3D Geospatial Data

**Compatible with commercial hardware
Seamless transition between virtual and real flight**

**Years of Expertise in Spatial Information Technology
Made in Taiwan • Quality Assured**
